Response to Office Action

Sir:

This Response is filed addressing the issues raised in the Office Action dated 10/05/05 regarding the above-noted application for patent. The Applicant submits that, in light of the remarks below and the requested amendments to the application, the application is in proper condition for allowance. The Applicant respectfully requests the examiner allow the amendments to the specification and claims and allow the patent to proceed to issue.

REMARKS

Paragraphs 1 notes an objection to an improper reference to the primary golf bag as reference number 200, specifically located on page 4, line 11 of the specification. This reference number has been corrected within the specification. Applicant found the other references in the specification to be correct in referencing the primary golf bag as number 100 and the short play golf clubs being number 200. This amendment to the specification has been made below.

Paragraph 2 notes a rejection based upon the Examiner's perception that Claim 1 contains insufficient structure to support the claimed reference to "...with said lower cylindrical ring fitting within said upper cylindrical ring...". Applicant has withdrawn the rejected material from Claim 1
